ABOUT THE PROJECT

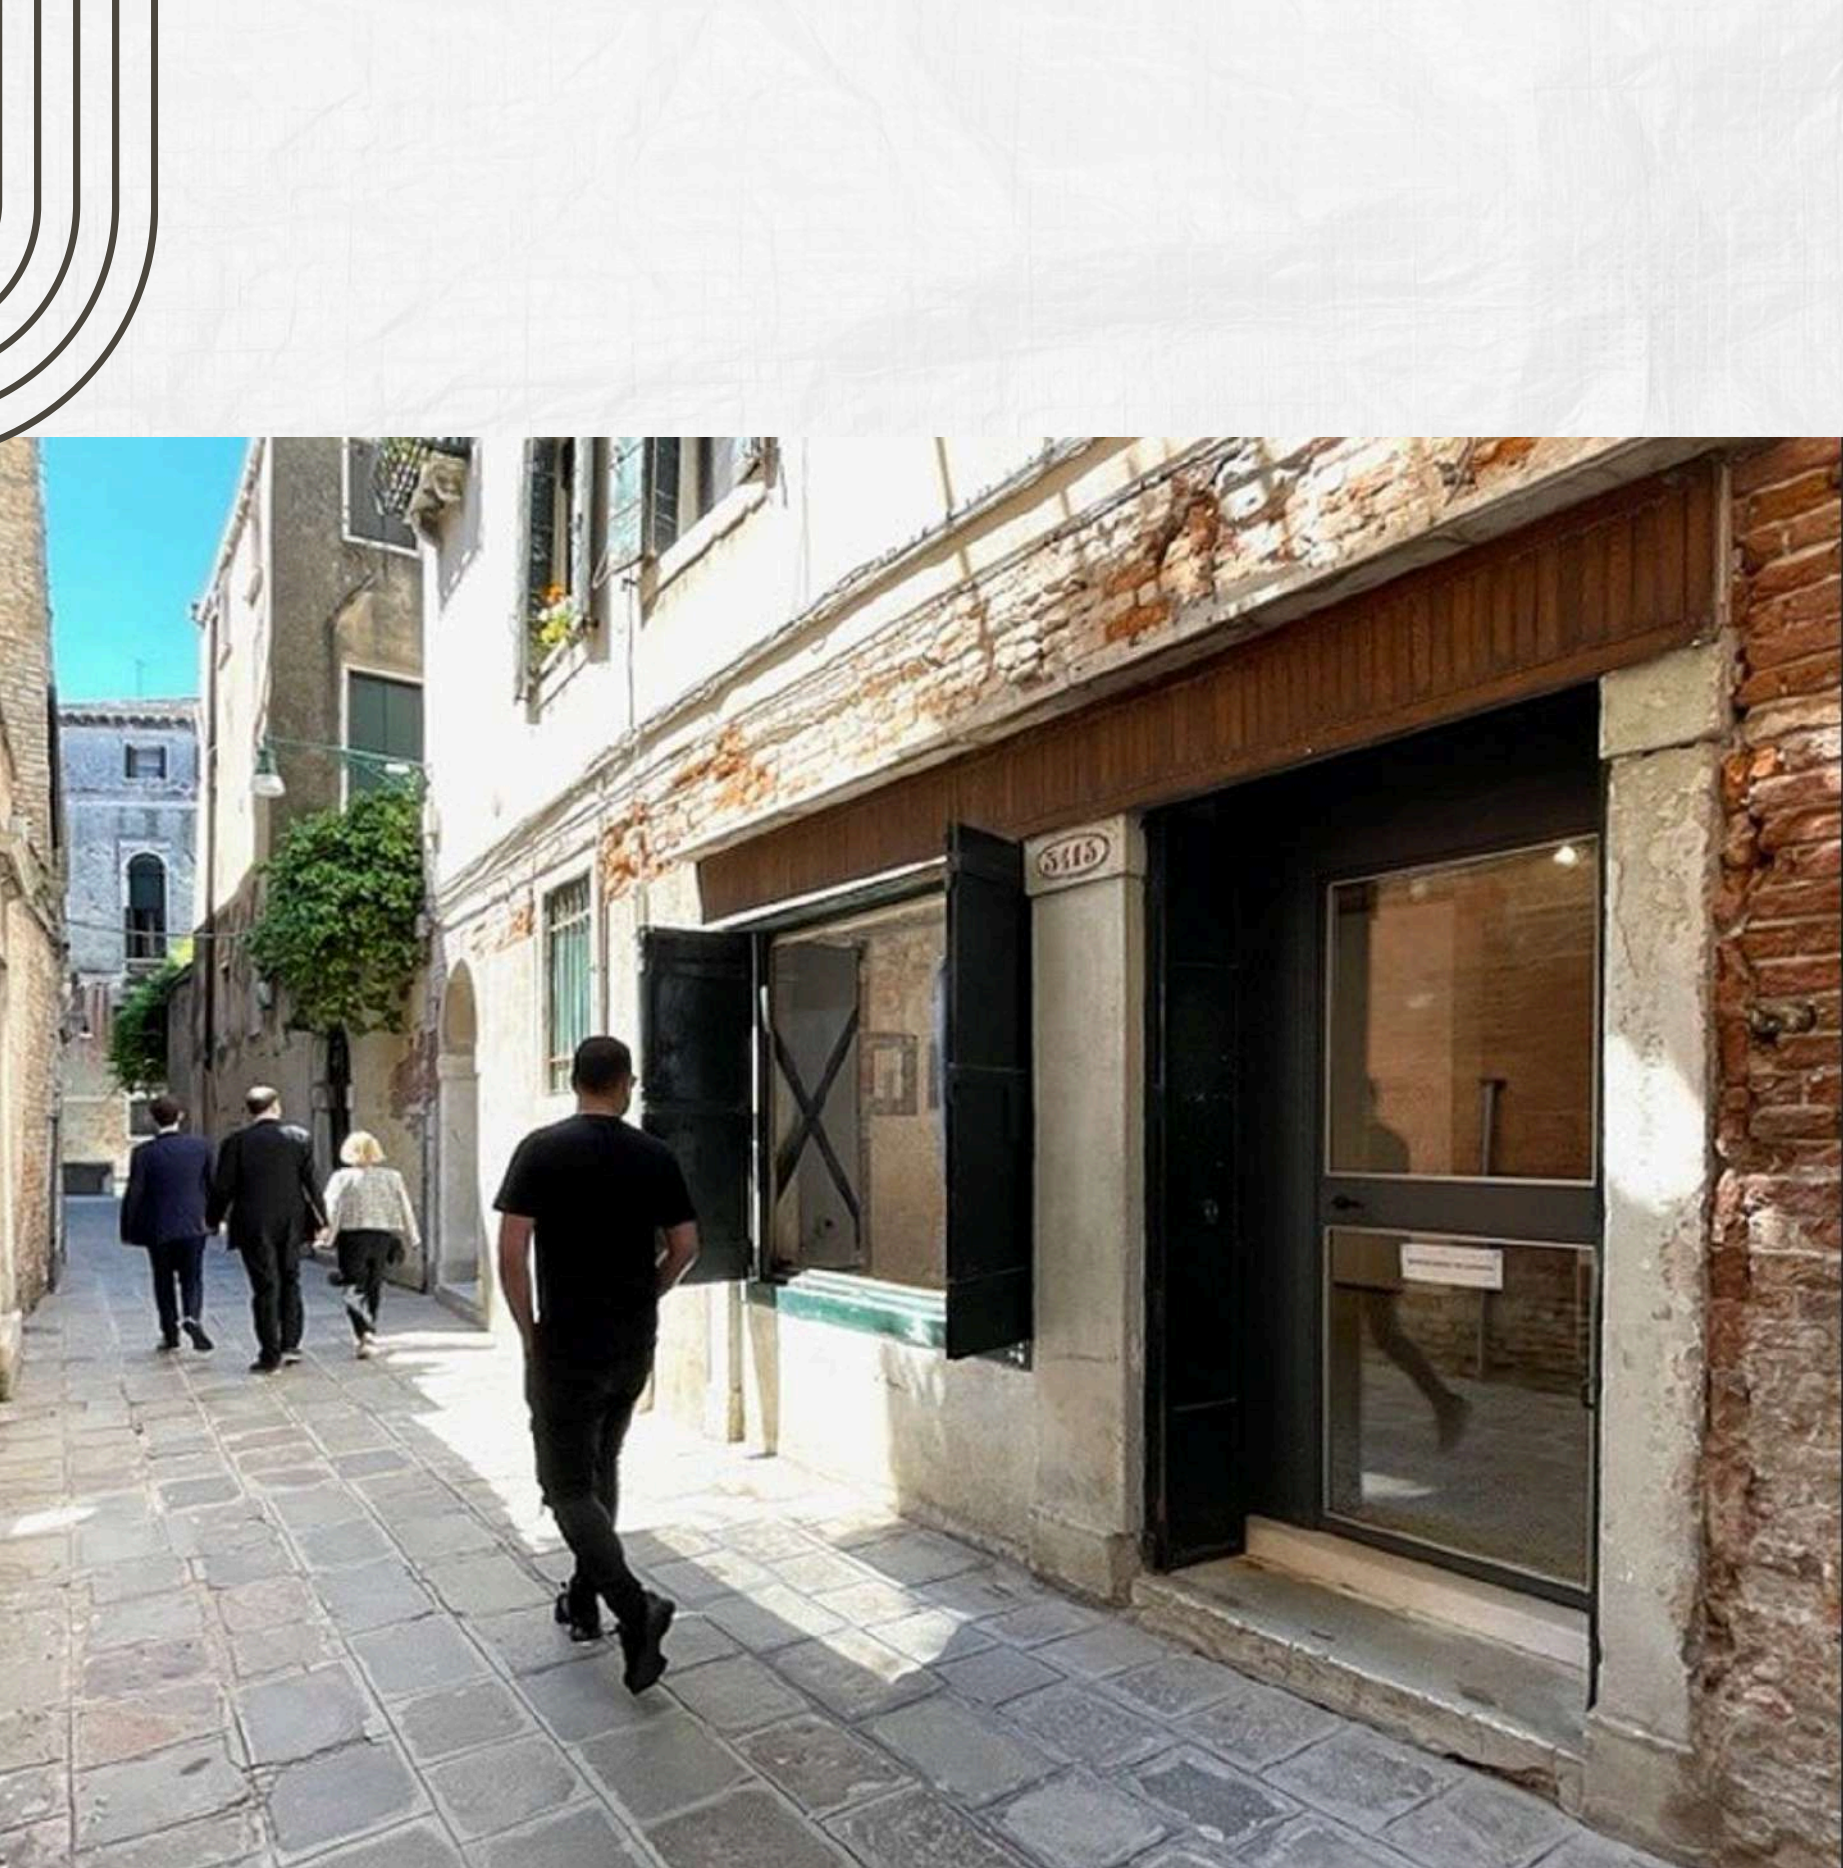

We invite architects, designers, landscape architects, and artists to take part in an extraordinary opportunity during the 2025 Venice Architecture Biennale, with optional pre-events in Paris.

This event will bring together emerging and established architects, landscape architects, artists, and designers, offering an exceptional platform to present and commercialize their projects to a diverse range of companies from various sectors.

Participation at this crucial moment allows you to showcase your work to an international audience, fostering valuable connections and collaborations that can propel your career forward.

Side by Side - 2022

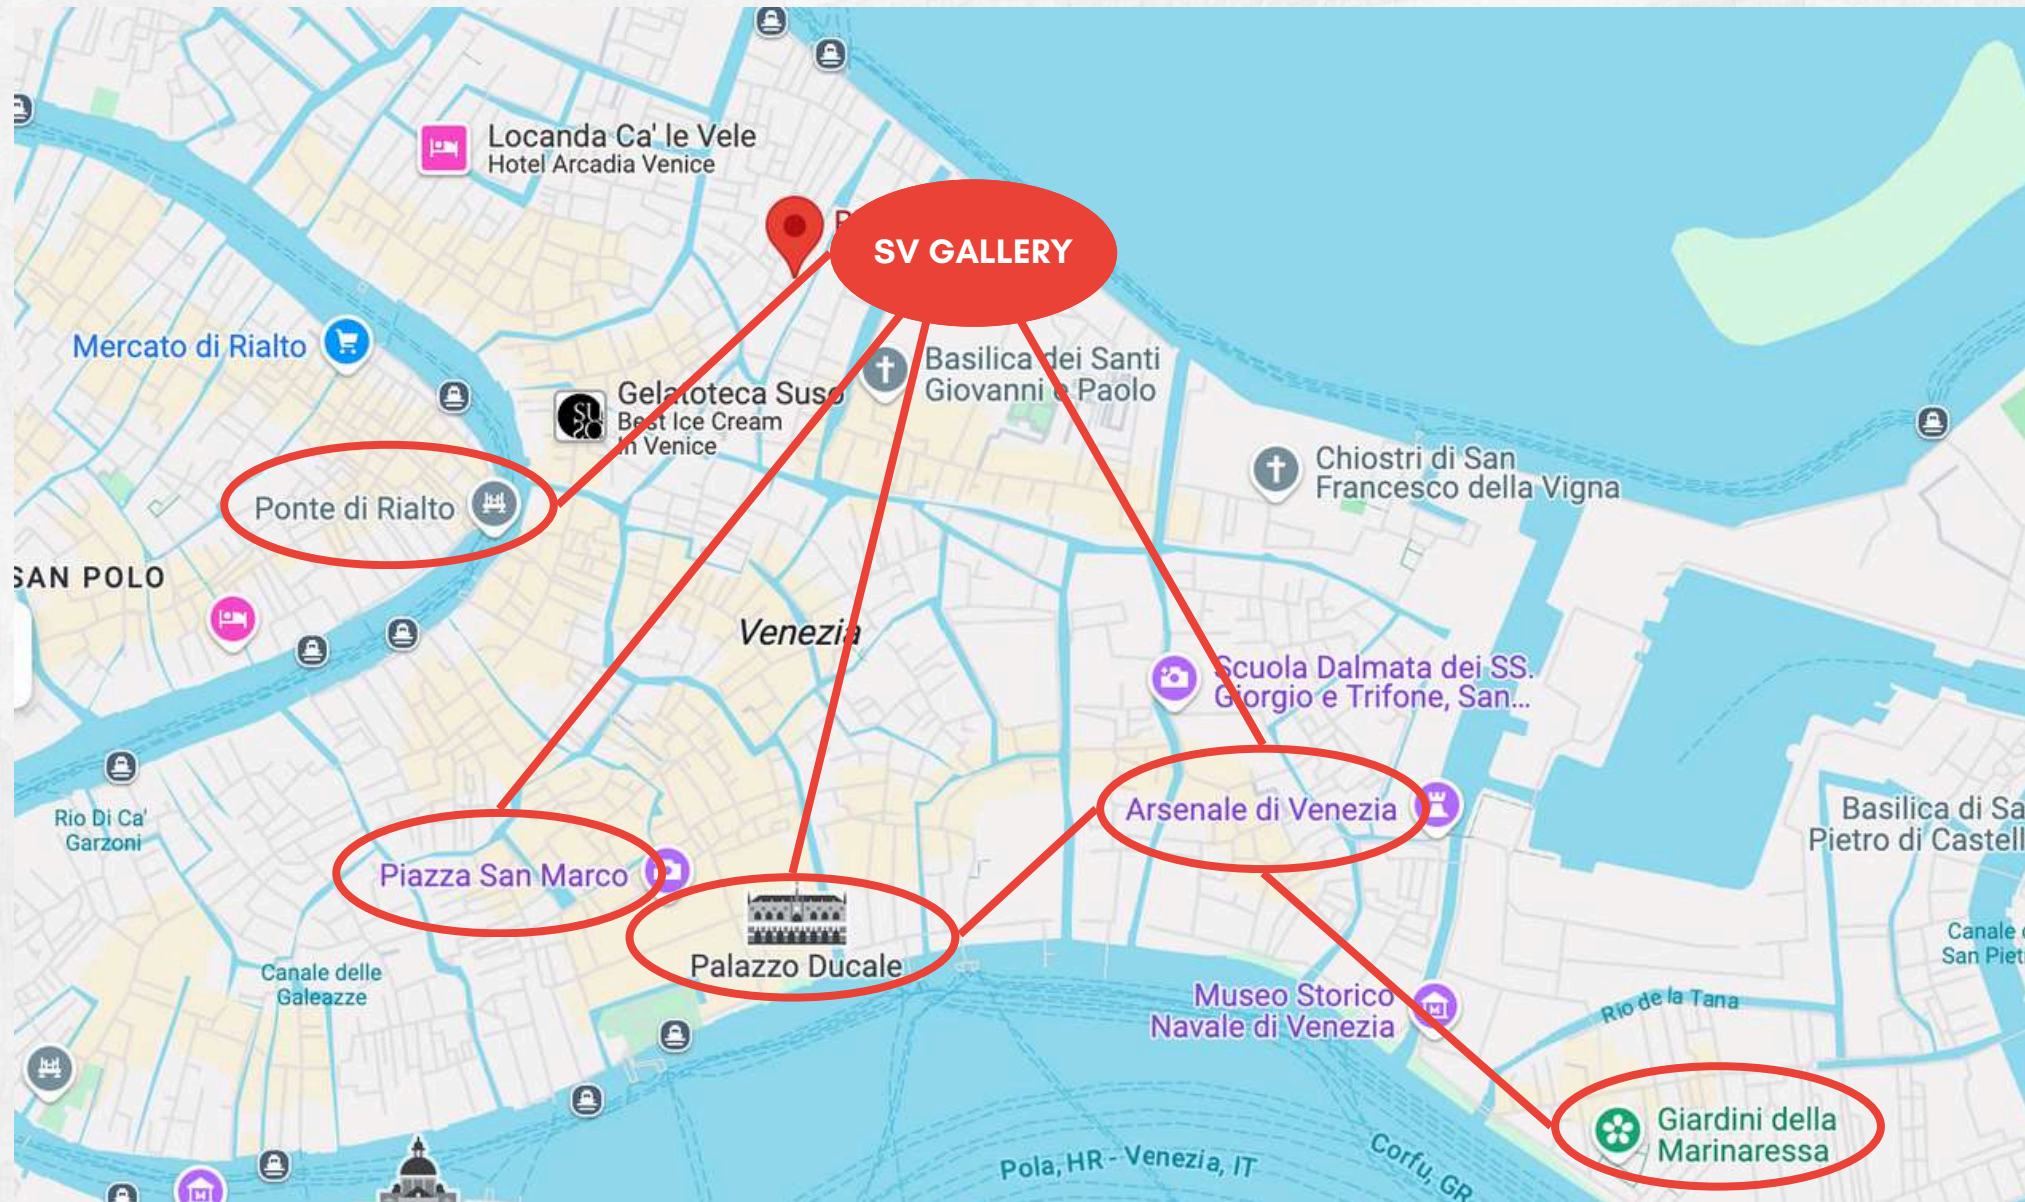

VENICE - ITALY

The exhibition will take place in a prominent gallery located in Cannaregio, a vibrant area of Venice where visitors from around the world come to explore innovative landscaping, architecture, and design projects.

The newly restored 75 m² flexible space is on the ground floor of a 17th-century house. The gallery is telescopic and can be easily divided into three sections, featuring a large window facing a busy street (Rio Terà dei Biri). It is situated in a high-traffic area well-served by water buses (Vaporetto stops Fondamenta Nuove and Ca' d'Oro) and has a private boat docking point just 15 meters away.

PARIS - FRANCE

In Paris, the gallery at Place des Vosges in Le Marais offers a historic and sophisticated setting for our event.

This iconic venue not only attracts a diverse audience but is also surrounded by a rich cultural heritage, making it the perfect location to discuss architectural innovations and establish valuable connections.

WHY PARTICIPATE?

The Biennale is a pivotal moment in the architectural calendar, attracting the attention of industry leaders, media, and potential clients. Your participation will not only increase your visibility but also position you at the forefront of contemporary architectural discourse.

Join us for this exciting endeavor, engage with other professionals, share your vision, and explore new possibilities in the dynamic world of architecture and design. We look forward to seeing you in Venice and Paris, where creativity and innovation come together!

EVENT HIGHLIGHTS:

- Exclusive Networking: Events with industry leaders, investors, and company representatives, offering opportunities to form partnerships and collaborations.
- Workshops and Lectures: Interactive workshops and talks led by renowned professionals on current trends in architecture, sustainable design, and technological innovations, providing participants with valuable insights.
- Access to Resources and Materials: High-quality resources, including portfolios, catalogs, design tools, and digital monitors, enabling architects to present their projects more effectively.

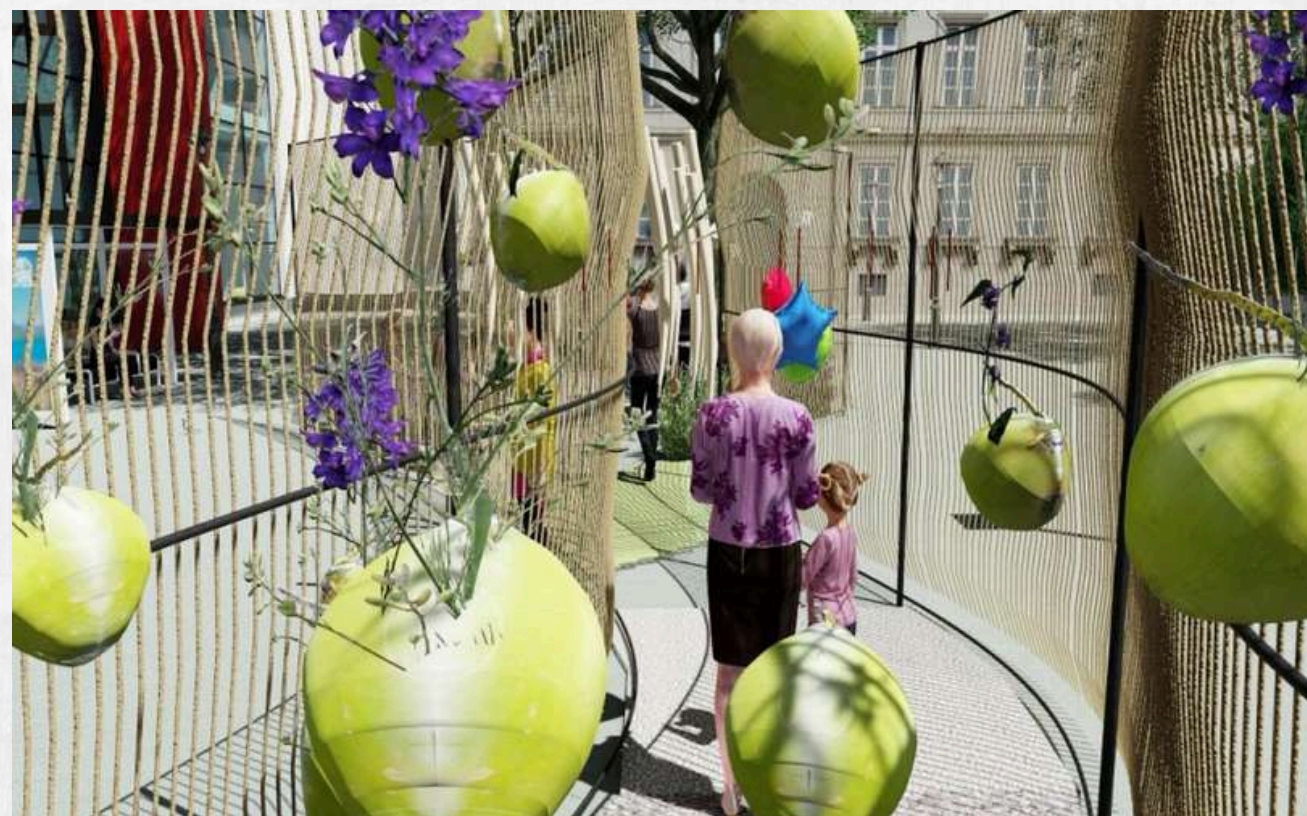

EVENT HIGHLIGHTS:

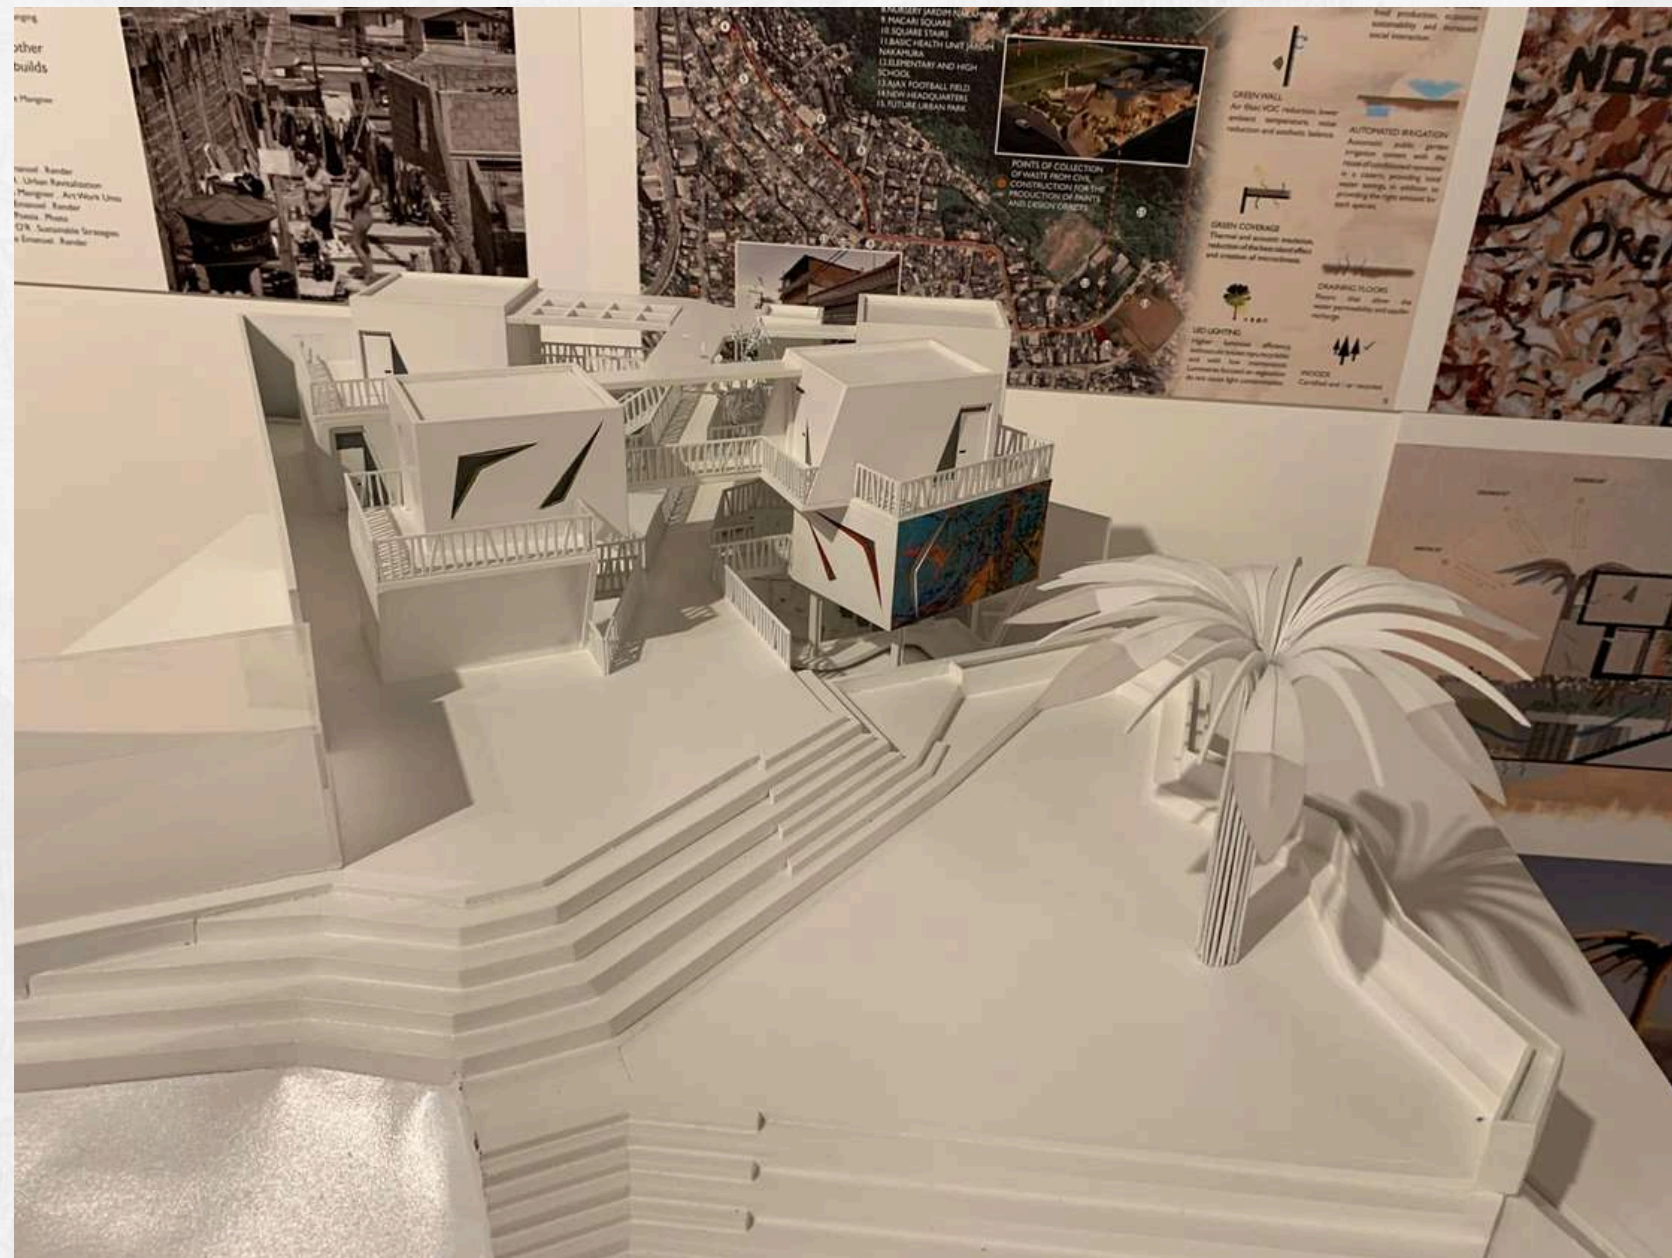

- Exhibition Space: Dedicated spaces for participants to showcase their work across various media, enhancing visibility with an international audience.
- Online Platform: An online platform for participants to share projects, network, and continue engagement after the events, broadening project exposure.
- Project Commercialization Support: Assistance in commercializing presented projects by connecting architects with companies and investors seeking new ideas and collaborations.

These services not only enrich the experience for architects but also encourage them to invest in their participation, recognizing the added value of engaging with the event.

SAPHIRA & VENTURA - ART DESIGN ARCHITECTURE and NEW YORK INTERNATIONAL CONTEMPORARY ART SOCIETY (NYICAS)

Present **WHEN ART MEETS ARCHITECTURE IN TIME-SPACE-EXISTENCE**, Venice Biennale 2021, at Palazzo Mora.

Saphira & Ventura focuses on exhibiting cutting edge international architects, designers, and contemporary artists. They represent a group of professionals from the US, Canada, Brazil, China, and Ukraine. Saphira & Ventura aims to provide its clients access to the international market by creating partnerships with public and private companies, museums, art fairs and other international entities. It develops projects for the global market customizing each one according to the objectives of the customers. It transforms spaces into exclusive and unique experiences. The mission of Saphira & Ventura is to find creative solutions that connect people to their ideas and spaces through sustainable practices and cutting-edge technology. These selected 12 projects are a collective work of artists, architects and designers that demonstrate how our society can live together harmoniously in TIME SPACE EXISTENCE.

EPHEMERAL INSTALLATION
Based on thinking about space for human relationships, architect Anna Persio's installation, provides an emotional connection between the individual and the environment. The ephemeral installation creates an atmosphere of contemplation and discovery of versatility.

FARKLETS
The Urban architect Cristiana Coates, joined by Daniele Garcia and Rayra Lira, developed a concept of "RE-CONNECTING BUS SHELTER", an innovative solution that brings together key concepts such as nature reconector, biophilia and sustainability.

SCHOOL FOR AUTISM
Saphira & Ventura is committed to architectural and design solutions that help mental to generate the same sense of well-being and raise the intuitive sense of touch for special needs such as AUTISM.

Architect Adriana Mavignier's **GARDEN GALLERY** will shed light on the project **WHEN ARCHITECTURE MEETS ART** with her thematic garden and her desire to create a space where nature blends with art. The sculptures mirror the beauty of the surrounding trees and plants, creating an inspiring harmony with them. This garden gallery is a thematic garden, imbued with deeper meanings and symbols, a way within the mind and consciousness.

JUCA MAXIMO, an artist and designer, has created an installation that hangs paintings in such a way that the walls and the paintings become one.

OSTAP PATYK from Ukraine, exhibits two main directions: one is an emotional reflection of reality with a focus on the beauty of the world, and the other is a philosophical rethinking of the world. The basis of Patyk's composition is the transformation of marine flora and fauna in a modern style. Patyk's projects are composed of mosaic murals.

BIENAL AMA-ZÔNIA 2022 AT VENICE ARCHITECTURE BIENNIAL 2021

Alexandre Mavignier, shows the series **GIANT WOMEN**, inspired by the extinction of the Yacombas Indian tribe, warrior female giants, women without men, whose history gave rise to the name Amazonas. The artist also presents **Amazon Tears**, a ceiling installation constructed with pieces of coals harvested from Amazonian ashes, denouncing the violence of people against nature and themselves.

Marcelo Junior - designer and photographer of the book "**MANGUEZAIS RAIZES MARANHENSES**" shows the area of mangroves in Maranhão state that produces more than 95% of the food that man catches from the coastal sea areas of the Amazon. It's vital for the ecosystem's survival and the subsistence of the communities that live there. The mangrove vegetation serves to protect the land, thus preventing erosion and at the same time stabilizing the coast.

Michael Schucht, producer of the documentary "**The Flying Rivers**" focuses on the way the Amazon forest cools the earth. A movement of large quantities of water vapor is transported in the atmosphere from the Amazon basin to other parts of the planet. Without the Amazon forest, no water; this gigantic water pump can no longer exist without the Amazon.

WALKACROPOLIS
Gotham Innovation Greenhouse team: Jee Wo Kim, Carl Skelton and Patrick Birmingham present **WALKACROPOLIS**. The project elevates pedestrianism to a new level. It takes pedestrianism "off the street" to a safer, brighter, quieter place and facilitates and supports autonomous vehicle circulation below.

FAVELA DA PAZ
Patricia O'Reilly, architect and urban planner, author of the social project Favela da Paz (Peace Slum) for sustainable urban renewal and architecture, transforms the stereotype of the favela into a livable urban community. Currently, the architect is raising funds for execution of this project.

THE PATH OF CONSCIOUSNESS
The Path of Consciousness, is a conjuncture of Neil Kerman's paintings, the sculptural vision of Antonio Spinoza, the structural design of Nicolas Fiedler, the graphics of the architect Samuel Garcia from Studio Papaya, and the reference of Edo's Rocha stadium architecture.

SHARING THE TABLE
Promoting shared spaces that stimulate exchanges, the project Sharing the Table by Graziela De Souza focuses on the moments in which we live, awakening the importance of being present in people's lives. As the table is completed with chairs, each human being feels complete when he shares. Graziela was able to respond to **TIME SPACE EXISTENCE** by gathering people around the table, with no distinctions, emphasizing what we share, what we have, and who we are.

CO-EXISTENCE IN TIME AND SPACE THROUGH COLOR AND MUSIC
The gallery's projects will also include...

THANK YOU
